REFLEXIONS

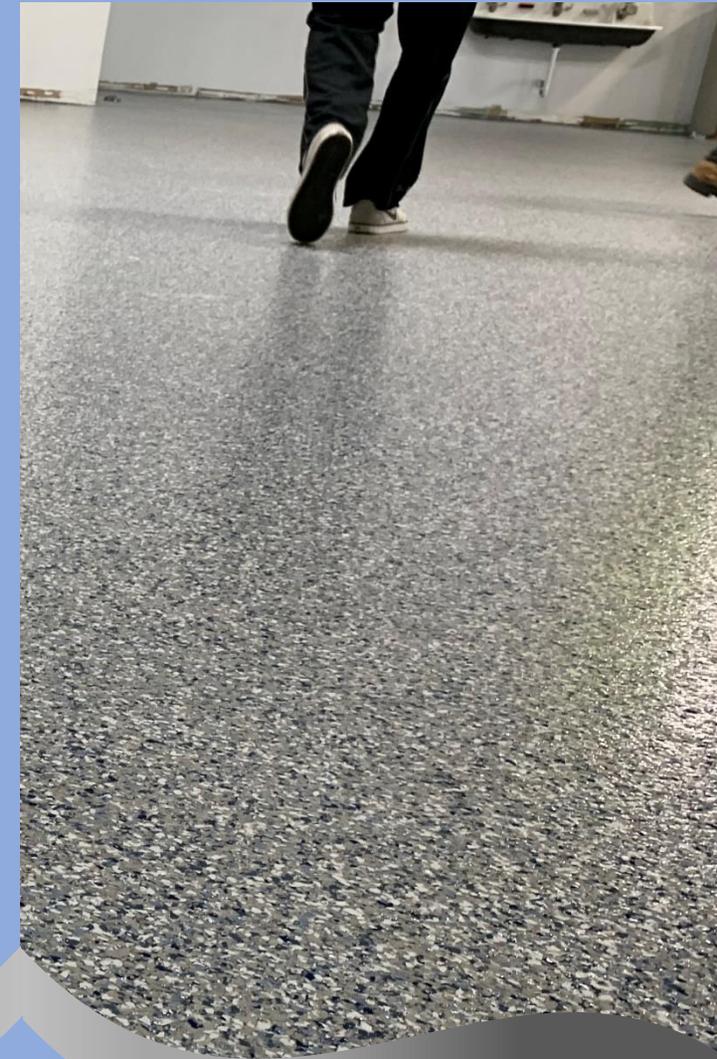

DUR-A-CHIP

DUR-A-QUARTZ

Often referred to as seamless floors or resinous flooring, epoxy floors are poured floors built for functionality and aesthetics. They are layered systems which are applied onsite with each layer having a specific purpose. The layers enable each resinous flooring system to be custom in design and to serve the demands of the exact area they are being applied.

*"Whether you need a decorative floor that will hold up to high foot traffic, sanitary floors in line with compliance requirements, a durable floor for your manufacturing facility, or a statement showpiece in your storefront or lobby, there is a seamless resinous flooring system to meet your needs."*

NORTHWEST  
**NFC**  
FLOOR CARE, INC.

Northwest Floor Care not only has the epoxy flooring knowledge that over **50 years** in the industry brings, but also every tool and machine necessary for every size job. **No matter how large!**

### DUR-A-SHIELD II

Consisting of a solvent-based epoxy primer coat plus a finish coat, Dur-A-Shield creates a high strength surface that is high gloss, easy to clean and resistant to abrasion, oil, gasoline, acids, and solvents.

### DUR-A-QUARTZ

Deluxe, multi-colored quartz aggregate fused with clear 100% solids epoxy provides resistance to solvents, acids, and other chemicals. Available in two grades: Q28 (fine) and Q11 (coarse), this system is a top choice for decorative quartz flooring applications. Certified by The National Floor Safety Institute (NFSI).

### DUR-A-GARD & DUR-A-GARD SL

Dur-A-Gard forms a smooth, high gloss finish and is also available in an orange peel finish formulation. If standard slip resistant performance is required, Non-Skid Grit can be added during the application process. Dur-A-Gard SL contains special fillers for self-leveling applications where thicker systems from 60-100 mils are desired.

### SHOP FLOOR

Natural colored quartz aggregate and pigmented Dur-A-Glaze Shop Floor epoxy make this the affordable industrial resurfacer. A solid color opaque, monolithic surface hides imperfections and stands up to abuse. Available in standard and course textures.

## FLOOR SYSTEMS

### DUR-A-CHIP

This decorative resurfacer fuses multi-color chips with 100% solids epoxy to provide a truly unique look. Chips are available in Macro and Micro sizes.

### MICA-FLEX E

A decorative floor system comprised of coats of 100% solids epoxy, natural mica flakes, and a durable UV resistant urethane topcoat. Mica flakes are available in macro and micro sizes.

### ReFLEXions

A decorative, poured in place flooring system combining Dur-A-Flex's durable and reliable resin systems with the latest in effects pigments to produce inspiring one-of-a-kind looks.

### POLY-CRETE® HIGH PERFORMANCE

#### POLYURETHANES

Poly-Crete polyurethane products were developed by listening to and recognizing our customers' flooring needs. These products also meet the torturous challenges and demands of today's individual process requirements. Poly-Crete is recommended for applications where wet processing, chemical contamination, and high temperature cleaning is performed. Poly-Crete systems meet strict food and safety guidelines in beverage, pharmaceutical, and chemical industries.
